

The image shows a close-up of laboratory equipment. On the left, a black cylindrical component with a white adjustment knob is visible, with the number '1' and the text 'ortoalresa Ns 220759/05' printed on it. To the right, several metal tubes are arranged diagonally, each with a label that reads 'ortoalresa Ns 220607/02'. In the background, a black container holds several red caps. A dark semi-transparent banner is overlaid on the right side of the image, containing the company logo and tagline.

About centrifugation

General applications | BIOCEN 22

BIOCEN 22

The Biocen 22 centrifuge is our offer for users that require a microcentrifuge with possible applications for microhematocrit and microtubes. Its small size, good performance and great versatility make it an essential tool. It gives the user complete control from the beginning of the process and many values can be customised according to the processes. Built to ensure the minimum increase of temperature inside the chamber due to the high-speed centrifugation process.

Features

- LED screen:
- Shows RPM/ RCF and time.
 - Speed programming in 50 RPM/ 10 xg steps.
 - Count up/down from “0” or at “set RPM/RCF” for reproducible tests.
 - Timer from 1 to 99 min. programmable in 1 min. steps and hold position.
 - Deceleration control in 3 steps: fast, soft and free.
 - Acoustic and visual messages on screen showing the equipment status to the user.

Easy to use

- Microprocessor controlled.
- Induction motor maintenance free (brushless).
- Rotors list in memory.
- Noise level: below 60 dB.
- Start, stop, open lid and short spin with adjustable speed buttons.
- Possibility to block or modify the speed during the cycle.
- Automatic lid opening, programmable.
- Low height for easy access.
- Last values remain in memory.
- Over-speed protection.

Safety

- Lid provided with security systems:
 - Automatic lid lock system, motorized.
 - Emergency lid-lock release.
 - Locking and protection against opening along the run.
 - Lid dropping protection.
 - Port in the lid for calibration and operation checking.
- Unbalance detection and switch off.
- Protection safety ring between the centrifugation chamber and the housing.
- Chamber of centrifugation in stainless steel (easy cleaning).
- Rotors can be removed with the lid closed. Hermetic lids.
- Rotors and adapters autoclavable, easy to install by the user.
- Forced ventilation to reduce temperature increasing
- Automatic disconnection for energy saving, with deactivation option.

3 YEAR
WARRANTY

Max. Capacity
24 x 2 ml / 12 x 5 ml

Max. Speed
21.885 xg / 15.000 RPM

Screen Type
LED

Version
Ventilated
